The writer collected some plants and made specimens while he had been staying at Cornell University, N. Y., U. S. A. in 1954—55. The following is the list of plants which were collected in the vicinity of the campus of Cornell University and Ithaca city, N. Y., and in Florida state.

On the plants collected near Ithaca city, English names were given from the following two books : Clausen, R.T. : Checklist of the Vascular Plants of the Cayuga Quadrangle 42—43° N., 76—77° W. (1949), and Muenscher, W.C. and Petry, L.C. : Keys to Spring Plants (1949).

The writer is indebted to Miss B. Bobear in Wiegand Herbarium, Cornell University for her kind help in identification of these plants.

摘 要

米国ニューヨーク州は同国の東北部に、フロリダ州は東南部に位置し、両州に産する植物の種類にはかなりの相違がみられるが、わが国ではまだ両州の植物についてあまり知られていないようである。筆者はたまたま、1954年9月より1か年ニューヨーク州コーネル大学に留学し、その間コーネル大学のキャンパスとイサカ市およびフロリダ州で127種の植物を採集したので、この目録を作成した。なお、イサカ市付近の植物については学名のほかに英名を付した。
